

### G40 High Test Tie Down Chain

| Trade Size in Inches | Item # | Working Load Limit in Lbs. | Weight Per Piece in Pounds |
|----------------------|--------|----------------------------|----------------------------|
| 3/8 x 12FT           | 47416  | 4700                       | 17                         |
| 5/16 x 20T           | 47420  | 4700                       | 21                         |
| 5/16 x 25FT          | 47425  | 4700                       | 25                         |
| 3/8 x 16FT           | 47520  | 6600                       | 33                         |

Uses: Made from high-test chain for heavy-duty trucking, towing, hauling, and tie-down.

Assemblies with clevis grab hooks on each end.

Finish - Bright Polish

**Caution: Do not use for overhead lifting. Working load limit must not be exceeded.**

### G70 Transport Tie Down Chain

| Trade Size in Inches | Item # | Working Load Limit in Lbs. | Weight Per Piece in Pounds |
|----------------------|--------|----------------------------|----------------------------|
| 5/16 x 16FT          | 47416  | 4700                       | 17                         |
| 5/16 x 20FT          | 47420  | 4700                       | 21                         |
| 5/16 x 25FT          | 47425  | 4700                       | 25                         |
| 3/8 x 16FT           | 47516  | 6600                       | 26                         |
| 3/8 x 20FT           | 47520  | 6600                       | 33                         |

Uses: Made from transport chain for higher working load limits. A lighter chain for trucking, towing, hauling, and load tie-down.

Assemblies with clevis grab hooks on each end.

Finish - Yellow Dichromate

**Caution: Do not use for overhead lifting. Working load limit must not be exceeded.**
